Retrieving your search results from EBSCOhost

After signing in with your City account, click on the EBSCOhost Databases link.

The databases available in EBSCOhost will be listed.

ONLY select those databases which you used for the saved search which you want to retrieve. If you do not do this your search will be performed using all the databases which have been ticked meaning that you will see more results than you found in your original search- many of which may not be relevant:

Select Sign In and sign in with your EBSCOhost account. Then select Folder:

(Sign IN will change to Sign Out when you log-in).
Retrieving a search
Click on Saved Searches:
For your selected search click on Retrieve Saved Search:

My Folder: Saved Searches

1. Research 1
   Properties, Saved Search (Permanent)
   Retrieve Saved Search  Edit Saved Search

Click on Rerun next to the search from which you want to view your results. The search at the top of the list will be the final search you made:

If you want to open another search you have saved, which was completed using different databases, it is advisable to log out of EBSCOhost and repeat the process again.
